This document offers a concise overview of Altagram's comprehensive QA services, emphasizing our commitment to excellence and collaborative approach.

Secure the link of gameplay and storytelling in one go.

Functionality Quality Assurance

Altagram FQA provides you with accurate and relevant information that helps you identify major blockers, potential cheats and exploits by challenging and submitting your title to efficient and focused functional testing. FQA ensures coverage of the following aspects:

Performance:

Stability within expected system requirements.

Graphics:

Texture and model adherence and fidelity.

Sound:

Voice and sound effect implementation.

Network:

Multiplayer, local and co-op gameplay.

Altagram's approach to QA is very thorough, providing detailed daily reports, complete with screenshots and comprehensive bug descriptions. Their meticulous process consistently results in superior outcomes.

Certification Quality Assurance

CQA helps prevent violation of rules and proper use of licenses and trademarks for all platforms. Our team is made of analytical thinkers and detail-oriented testers, ensuring coverage of the following aspects:

Terminology compliance:

Ensuring platform-specific terminology is being properly used and flagging prohibited terms.

Software Compliance:

Verifying that requirements and standards of the Platform manufacturers are conformed avoiding delays in submission.

Localization Quality Assurance

A high quality LQA service can help ensure game sales are optimal and players can experience a rewarding gameplay, tailored to their culture. Our native speaker team of testers can certify that the context and flow of each localized product works for each user. LQA ensures coverage of the following aspects:

Linguistic:

Grammar and punctuation, typos, and contextual issues.

System and UI:

String implementation and on-screen defects.

Culturization:

Cultural inconsistency and diversity and inclusion.

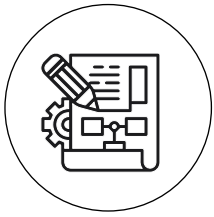

Audio:

Localized voice-over and subtitle synchronization.

Our
tools:

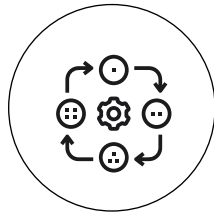

Methodical workflow from beginning to end of your project.

Test Planning:

Our Test Leads will craft a personalized and detailed plan, based on your requirements, to guide testers through the most efficient and complete path to test your game.

PHASE 1

Testing Phase:

Our Testers will follow the Test Plan and report all issues encountered, providing your team of developers with all the necessary information to reproduce and fix those issues.

PHASE 2

Regression Phase:

Once the developers provide fixes for the reported bugs, our team goes through the new version of the game and verifies the proper implementation of the fixes to complete the pass.

PHASE 3

Future Content and Update Support:

With the progressive updates in game content, our team can continue to support with QA, focusing on the new scope of testing, and ensuring consistent quality within each new addition.

PHASE 4

For LQA, the comprehensive coverage Altagram provided for our game was impressive. Their flawless execution and attention to detail resulted in a professional and solid service. //
